aEx®

Process WITH Automation

Know what is needed, when it is needed.

90%

of hospital linen never reaches the end of its **USEFUL LIFE**. With linen accessible to anyone who walks by the unsecured cart, hospital linen becomes a "free for all" which causes shortages and frustration for nursing personnel.

THE PROBLEM

THE SOLUTION

Reengineer hospital linen management with the alEx Linen Center. Secure carts eliminate unauthorized users, allowing nurses to have the linen they need to care for their patients — driving down replacement and processing costs. Real time notifications allow the linen team to proactively address the linen issues to increase satisfaction amongst the staff and eliminate the need to hoard linen in patient rooms. Plus, linen is always covered promoting infection prevention.

alEx is offered as a capital purchase or operating dollars can be used with our subscription program - which is within your operating budget and can produce savings from day one. Contact us today to schedule your free assessment at 888-200-4797.

IMPROVE YOUR LINEN MANAGEMENT PERFORMANCE WITH THE alEx SOLUTION

SECURE

alEx controls utilization of linen by providing access only to authorized staff members while maintaining infection prevention compliance for safe storage of linen.

EFFICIENT

Utilize real-time data alerts to streamline the linen management process and improve service needs management.

PROACTIVE

Take advantage of real-time scrub and linen usage data and customized alerts for inventory replenishment.

CUSTOMIZABLE SOLUTIONS FOR EVERY HOSPITAL

Supports any stocking strategy

LINEN CENTER

Take linen management to the next level

SINGLE DISPENSE

Dispenses linen for EMS professionals

alEx SD With alEx SD the EMS professionals use their alEx smart key to access the machine. This gives them access to linen, but doesn't allow them to take more than what is designated by the hospital.

THE SAVINGS

A Strong Return on Investment

On average, our customers save up to 20% on linen replacement costs because linen is no longer walking out the door. Additionally, by locking out unauthorized users and using data to stock linen at proper par levels, processing costs can be reduced by 20%.

Increased Linen Management Efficiency

alEx streamlines linen management by providing exceptional visibility into linen utilization. A scale embedded in each cart tracks the amount of linen removed by weight, allowing real-time inventory visibility via the linen management software system. Plus, if a cart's inventory runs low customized notifications send email and text alerts to the linen management team.

THE SOFTWARE

Our web-based linen management software system allows proactive monitoring at anytime, anywhere.
