IPA™

IMPROVE YOUR SCRUB MANAGEMENT PERFORMANCE WITH THE *scrubEx* SOLUTION

THE PROBLEM

THE SOLUTION

scrubEx reengineers surgical scrub distribution within your hospital. Our secure machines provide authorized staff with clean scrubs in the right size exactly when they are needed. Scrub purchasing and laundering costs are reduced by eliminating unauthorized scrub access. The program also drives compliance with AORN Guidelines for Surgical Attire, helping reduce the risk of surgical site infections.

scrubEx is offered as a capital purchase or operating dollars can be used with our subscription program - which can produce savings from day one. Contact us today to schedule a free scrub distribution assessment with one of our experienced professionals at **888.200.4797**.

SECURE

Control utilization of scrubs providing access only to authorized staff members while maintaining infection prevention compliance for safe storage of scrubs.

EFFICIENT

Utilize real-time data alerts to streamline the scrub management process and improve service needs management. And with a dispense time of less than 5 seconds, *scrubEx* dispenses scrubs faster than looking through a ransacked cart.

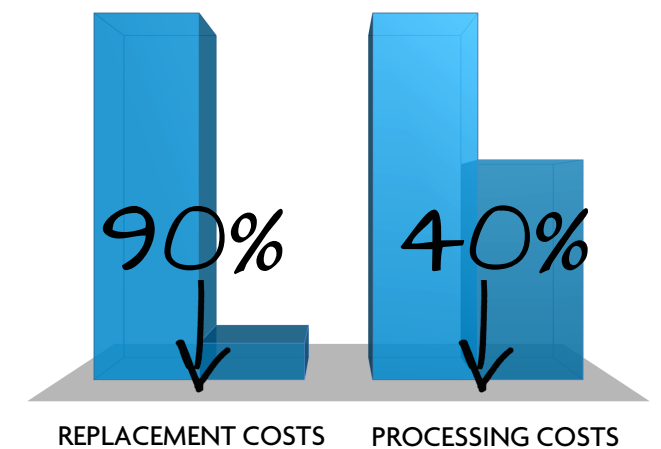

PROACTIVE

Take advantage of real-time scrub usage data and customized alerts for inventory replenishment.

THE SAVINGS

Better Service, Lower Costs

Not only will your clinicians be more satisfied with their scrub service, but by reducing theft and putting an end to hoarding on average our customers see a reduction in scrub purchases of 90% and a 40% decrease in processing costs.

CUSTOMIZABLE SOLUTIONS FOR EVERY HOSPITAL

Small footprint for maximum flexibility

LARGE VOLUME DISPENSER
Dispenses clean scrubs

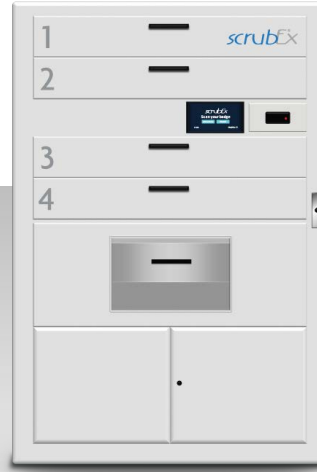

LVD and LVR each can serve up to 170 users per day

LARGE VOLUME RECEIVER
Receives soiled scrubs

COMBINATION UNIT
Dispenses and receives scrubs

MV can serve up to 75 users per day.

COMBINATION UNIT
Dispenses and receives scrubs

SV can serve up to 40 users per day.

*All machine sizes can accommodate jackets.

Increased Linen Staff Efficiency

No other scrub distribution method saves time like *scrubEx*. Each unit requires just 5-10 minutes to re-stock, and real-time inventory visibility is provided via the scrub & linen management system. Plus, if a department's scrub inventory runs low customized notifications send email and text alerts to linen management.

THE SOFTWARE

Our web-based scrub and linen management software system allows proactive monitoring at anytime, anywhere.
